From information to intelligent tourism

Dear friends, partners and members of our growing tourism community,Eight years ago, Aruba Tourist Channel began with a clear purpose: help visitors understand Aruba better. We wanted travelers to see more than a postcard and to discover the people, places, businesses, culture and experiences that make this island different.

Today, that mission has not changed. What has changed is what technology now allows us to do.

In 2026, Aruba Tourist Channel is no longer only a channel that publishes tourism information. Through Aruba Intelligence and The Advisor AI, we are building a connected visitor ecosystem that can guide a traveler from the first question about Aruba to the decisions that shape the actual trip.

A visitor can ask where to stay, what to do, how to get from the airport, which area fits a family, where to eat, how to plan a romantic evening, where to find wellness or how to organize several days without spending hours searching dozens of websites.
The goal is not to give everybody the same answer. The goal is to understand what the traveler is trying to accomplish and connect that person with the most relevant Aruba options.
World Tourism Day 2026 is especially meaningful for us because its international theme, Digital Agenda and Artificial Intelligence to Redesign Tourism, describes the transformation we have been working toward: not AI for the sake of AI, but technology that makes tourism more useful, more connected and more human.

Our eighth anniversary marks a transition. Aruba Tourist Channel started as tourism media. It became a travel guide, then a digital platform. Today it is becoming an intelligent layer between the visitor and Aruba.

We remain convinced that the strongest tourism technology must begin with local knowledge. Artificial intelligence can recognize intent, but the quality of the answer depends on the quality of the Aruba knowledge behind it.

To every visitor, partner, tourism worker and local business that has contributed to this journey: thank you. The next chapter is about making the connection between Aruba and its visitors even smarter while keeping the people of Aruba at the center of the experience.

Noord, Aruba

The Complete Travel Guide

By ArubaTouristChannel.com

Noord is one of Aruba's most iconic regions — a vibrant blend of dazzling beaches, world-class resorts, lively nightlife, and rugged northern coastline. Located at the top of the island, Noord stretches from the bustling Palm Beach high-rise strip to the quiet snorkeling coves of Malmok and the dramatic cliffs near the California Lighthouse. Whether you want action, relaxation, or a taste of nature, Noord offers a little of everything that makes Aruba unforgettable.

1. Beaches of Noord
Noord is home to some of the most famous — and most photographed — beaches in Aruba.

Palm Beach
Palm Beach is the heart of Aruba's resort scene: soft white sand, calm waters, and a two-mile stretch dotted with luxury hotels, beach bars, restaurants, and shops. The water is perfect for swimming, jet skiing, parasailing, or simply floating in the gentle Caribbean waves. With its wide boardwalk and nightlife just steps away, Palm Beach is ideal for travelers who want convenience and entertainment.

Malmok, Boca Catalina & Tres Trapi
Just a few minutes north of Palm Beach, the coastline becomes quieter and more natural. Malmok Beach, Boca Catalina, and Tres Trapi are known as the island's top snorkeling zones. Here, the sea is crystal-clear, shallow, and full of marine life — perfect for families, beginner snorkelers, or anyone wanting a calm ocean experience.

Arashi Beach
Further north, Arashi Beach is picturesque and peaceful, with soft sand and a local family-friendly vibe. It's great for swimming, snorkeling, and sunset watching. Arashi is also just a short walk or drive from the California Lighthouse.

2. Accommodations in Noord
Noord offers the widest range of accommodations in Aruba, making it a perfect base for all types of visitors.

High-Rise Resorts (Palm Beach Strip)
The famous high-rise hotel zone includes well-known international brands, large pools, beachfront dining, casinos, and spas. These resorts are ideal for travelers seeking amenities, convenience, and a lively atmosphere.

Boutique Hotels & Adult-Only Options
Noord also offers smaller boutique stays, villa-style resorts, and adult-only accommodations tucked away from the busy areas. These are perfect for couples, honeymooners, or visitors wanting a quieter experience.

Vacation Rentals, Condos & Villas
The residential neighborhoods of Noord — such as Bakval, Rooi Santo, and Malmok — are filled with modern villas and condos. These offer privacy, space, and a local feel, often within minutes of Palm Beach.

3. Food, Drinks & Nightlife
Noord delivers some of the most diverse dining and entertainment options on the island.

Dining
From beachfront bars to upscale restaurants, the Palm Beach area has something for every taste. Visitors can enjoy fresh seafood, Caribbean cuisine, international dishes, steakhouses, and romantic oceanside dining setups.

Bars & Lounges
The nightlife scene is vibrant and varied. Beach bars, pubs, cocktail lounges, and open-air entertainment spots line the Palm Beach strip. Many offer live music, DJ sets, and themed nights.

Casinos & Hotels Entertainment
Many major hotels feature casinos, live performances, and nightly entertainment. For travelers who enjoy nightlife without leaving their resort, Noord is the perfect choice.

4. Nature & History
Beyond the beaches and nightlife, Noord has a strong connection to nature, heritage, and local culture.

California Lighthouse & Northern Cliffs
The iconic California Lighthouse stands as a landmark offering panoramic island views. Surrounding it are rugged trails, limestone cliffs, and dramatic wave-crashing scenery — a stark and beautiful contrast to the calm southern beaches.

Bubali Bird Sanctuary
Near the hotel area, Bubali Plas is a protected wetland with an observation tower and a variety of local and migratory birds. It's a peaceful spot for nature lovers and photographers.

Alto Vista Chapel
Built in the 18th century, Alto Vista Chapel is one of Aruba's most historic religious sites. Located on a hill, it offers quiet reflection and sweeping views of the sea and desert landscape. It's also a popular spot for scenic walking and cycling.

5. Practical Tips for Exploring Noord
Getting Around
Noord is walkable in the Palm Beach and hotel zones.
For beaches like Arashi or northern attractions, renting a car or using taxis is recommended.
Public buses run between the hotel area and downtown Oranjestad.

Ideal for All Travelers
Families: calm beaches, safe swim zones, and many dining choices.
Couples: romantic sunset spots, boutique hotels, and quiet coves.
Adventure Seekers: snorkeling, water sports, and rugged coastal trails.
Nightlife Lovers: casinos, bars, and clubs all within walking distance.

Best Time to Visit
Noord is beautiful year-round, with consistent sunshine, warm temperatures, and very little rain. The area can be lively during peak travel seasons, so visitors seeking privacy might prefer staying in Malmok or Arashi instead of the Palm Beach strip.

Final Word
Noord captures everything that makes Aruba special. Whether you're snorkeling in Boca Catalina, dining on Palm Beach, hiking near the lighthouse, or relaxing on soft white sands, the Noord region delivers the perfect balance of beauty, fun, and Caribbean charm. It's no surprise that many travelers return to this area year after year — it feels like the center of Aruba's energy, yet still offers hidden corners of peace and nature.

A wonderful Aruba to live in is a wonderful Aruba to visit

As Aruba's Destination Marketing and Management Organization, the Aruba Tourism Authority (A.T.A.) continues to advance a tourism vision centered on creating value for our island, our people, and our guests. Guided by our compass and the values of Courage, Compassion, Curiosity, and "Curason" (Heart), we remain committed to ensuring tourism contributes positively to Aruba's future. We are grateful to every guest who chooses Aruba and who become part of that lasting connection that exists between the island and the people who experience it. Together, we need to continue to strive to protect what makes Aruba unique and meaningful. We believe that a wonderful Aruba to live in, is a wonderful Aruba to visit!

On behalf of the Aruba Tourism Authority, we congratulate Aruba Tourist Channel on its 8th anniversary. We thank them for their continued contribution and for helping connect guests with Aruba's experiences, culture, and people. We wish the entire team continued success in the years ahead.

***Ronella Croes** - CEO Aruba Tourism Authority*

Tourism that creates value for Aruba and its people

Tourism is one of Aruba's greatest strengths, but its true value must be measured by what it contributes to our people, our quality of life and the future of our island. Our direction is therefore clear: tourism must continue to create opportunity while protecting the natural environment, strengthening our community and delivering a quality experience for every guest who chooses Aruba. This reflects Minister Cicilia's public emphasis on environmental stewardship, social inclusion and a more value-driven, resilient tourism economy.

The people working throughout our tourism industry are at the heart of that experience. From our hotel employees, chefs and taxi drivers to our tour guides and many others, they transform everyday service into the memories visitors take home. At the same time, the success of tourism must be reinvested in Aruba itself, in a cleaner island, better infrastructure, greater efficiency and improvements that benefit both residents and visitors.

To every visitor, thank you for choosing Aruba and for becoming part of our island's story. We invite you not only to enjoy Aruba, but also to respect and help preserve what makes our destination so special.

On behalf of the Government of Aruba, I congratulate Aruba Tourist Channel on its 8th anniversary and recognize its continued contribution to connecting visitors with our island, our businesses and our people.

Mr. Wendrick Cicilia, - Minister of Tourism

Eagle Beach, Aruba

The Complete Travel Guide

By ArubaTouristChannel.com

Eagle Beach is consistently ranked among the most beautiful beaches in the world, known for its soft white sands, calm turquoise waters, and iconic fofoti trees leaning into the breeze. Located just south of Palm Beach, Eagle Beach offers a more peaceful and spacious atmosphere — perfect for visitors who want pristine beauty without the constant energy of the high-rise district. Wide, quiet, and unforgettable, Eagle Beach captures Aruba at its most serene.

1. The Beauty of Eagle Beach

Eagle Beach is famous for its postcard-perfect look: wide stretches of powdery sand, shallow warm water, and unobstructed views of the Caribbean Sea. Unlike the busy high-rise strip, this beach feels open and relaxed, with plenty of space to settle into your own corner of paradise.

Tranquil Waters & Space to Relax

The sea at Eagle Beach is calm, crystal-clear, and ideal for swimming. The beach is extremely wide — one of the broadest in Aruba — giving everyone room to sunbathe, walk, or simply enjoy the scenery without feeling crowded.

The Iconic Fofoti Trees

Two of Aruba's most photographed trees, the twisted fofoti trees, are located on Eagle Beach. Their windswept shape makes them a favorite backdrop for photos, wedding shoots, and sunset moments.

Perfect for Sunsets

Eagle Beach faces west — meaning you get breathtaking, uninterrupted Caribbean sunsets every evening. Many visitors return just for the dramatic colors that paint the sky over the calm shoreline.

2. Accommodations Around Eagle Beach

Eagle Beach is known for its low-rise resort zone, creating a more relaxed and intimate atmosphere than the high-rise strip.

Low-Rise Resorts

These smaller-scale hotels (2–5 floors) offer a boutique-friendly feel, fewer crowds, and direct beach access. Many provide beach cabanas, beachfront restaurants, and a quieter vacation experience.

Condo Resorts & Vacation Rentals

The area also includes several condo-style resorts with spacious units, kitchens, and beach views. These options are ideal for families or long-term travelers who want privacy and home-style comfort.

Adults-Only & Wellness Hotels

Eagle Beach has a growing number of adult-oriented hotels, boutique resorts, and wellness retreats perfect for couples, honeymooners, and travelers looking for rest and tranquility.

3. Food, Drinks & Nightlife

While Eagle Beach itself is peaceful, the surrounding area has a strong selection of dining and entertainment options.

Beachfront Dining

Several restaurants along Eagle Beach offer romantic ocean-view dining. Expect seafood, Caribbean flavors, international fusion dishes, and candle-lit setups right on the sand at some locations.

Bars & Lounges

Though quieter than Palm Beach, Eagle Beach still offers cozy bars, hotel lounges, and casual beach bars where you can enjoy cocktails, music, and good company.

Close to Palm Beach & Oranjestad

Eagle Beach is situated perfectly between two vibrant areas:

Palm Beach: 3–5 minutes north for nightlife, casinos, clubs, and late-night dining
Oranjestad: 7–10 minutes south for restaurants, shopping, and cultural attractions
This gives visitors the best of both worlds: tranquility by day, energy by night.

4. Nature & Local Highlights

Eagle Beach offers more than just sand and sun. It also has cultural significance and seasonal natural attractions.

Sea Turtle Nesting Site

Eagle Beach is one of Aruba's most important nesting grounds for four species of sea turtles, especially the hawksbill and loggerhead. From March to November, visitors may see protected nests marked by the island's nature foundation. It's a rare, magical experience.

The Fofoti Trees

These iconic trees, shaped by Aruba's constant trade winds, are a symbol of the island's natural beauty. They are often featured in Aruba's tourism campaigns and are must-see landmarks for visitors.

West-Facing Sunsets

Eagle Beach is perfectly positioned for sunsets that illuminate the entire shoreline. Locals and tourists gather nightly for photography, walks, and peaceful endings to their day.

5. Practical Tips for Enjoying Eagle Beach

Best Time to Visit

Early mornings: quiet, ideal for long beach walks
Midday: warm sun and bright turquoise water — great for swimming
Evenings: spectacular sunsets and a cool breeze

Getting Around

Eagle Beach is walkable along the coastline.
Taxis and buses are available nearby.
Renting a car or bike is useful for exploring neighboring beaches and attractions.

Family-Friendly

Eagle Beach's calm waters and wide sandy areas make it perfect for families with kids. The gradual shoreline offers easy entry into the sea.

Perfect for Couples

Romantic walks, ocean-view dining, and adults-only resorts make Eagle Beach a favorite for honeymooners and couples seeking tranquility.

Beach Facilities

Most resorts provide beach chairs and palapas for their guests. Public areas have space for towels and umbrellas, and vendors often rent out chairs.

Final Word

Eagle Beach is more than a destination — it is a feeling. Wide open sands, gentle turquoise waters, and quiet natural beauty make it one of Aruba's true gems. Whether you're swimming, relaxing under a fofoti tree, enjoying a glowing sunset, or simply walking the shoreline, Eagle Beach invites you to slow down and connect with the island's peaceful spirit.

For visitors seeking the perfect balance of serenity, comfort, and easy access to Aruba's top attractions, Eagle Beach is the ideal choice — and one of the most unforgettable beaches in the Caribbean.

Around Aruba Tours: Adventure with Aruba at the center

THE ADVISOR AI PARTNER NETWORK

By ArubaTouristChannel.com

From UTVs and ATVs to private Jeeps, safari vehicles and boat experiences, Around Aruba Tours gives travelers multiple ways to move beyond the resort zone and experience the island with a local guide.

Around Aruba Tours is the kind of partner that fits naturally inside an intelligent Aruba itinerary because adventure is never one-size-fits-all. Some visitors want the adrenaline of driving a UTV along Aruba's rugged terrain. Others prefer the comfort of a private air-conditioned Jeep, the open feel of a safari vehicle, or a day on the water. Around Aruba Tours brings those different styles together under one experienced local operator.

The company offers guided UTV and ATV tours, private Jeep experiences, open-air safari tours and boat options. Its off-road programs are built around Aruba landmarks and landscapes such as Alto Vista Chapel, Bushiribana, Ayo Rock Formation, the Natural Bridge area and the rugged north coast. Certain programs also include stops at Philip's Animal Garden, while pickup and drop-off are included on several tours. The result is an experience that combines sightseeing with the confidence of traveling with people who know the route, the terrain and the island.

For The Advisor AI, that variety is valuable. A couple looking for a private island day should not receive the same suggestion as an adventurous group that wants to drive its own UTV. A family may prefer a guided vehicle with more comfort. A cruise visitor may need an experience that fits a limited time window. Around Aruba Tours gives the system real alternatives to match to the traveler's pace, interests and transportation needs.

Our strongest recommendation is to use Around Aruba Tours when you want to see a side of Aruba that is difficult to understand from the hotel district alone. The rugged coastline, rock formations, historic sites and desert landscape tell a different story of the island. A guided experience adds context while removing much of the uncertainty about where to go and how to organize the day.

For visitors who want one high-energy day inside an otherwise relaxed beach vacation, this is one of the easiest ways to create contrast in the itinerary: beach one day, Aruba adventure the next.

THE ADVISOR RECOMMENDS THIS FOR

- Adventure travelers who want more than a beach day
- Couples, families and groups that want a guided island experience
- Visitors who prefer pickup/drop-off and a structured route
- Travelers choosing between UTV, ATV, Jeep, safari and boat experiences

Mornings are perfect for beach time at Baby Beach.

San Nicolas shows a different side of Aruba — artistic, soulful, and deeply connected to local culture. It's a place where murals tell stories, where families gather at Baby Beach, and where the island's carnival spirit thrives. Whether you come for the beaches, the art, the food, or the history, San Nicolas offers an unforgettable experience full of authenticity and charm.

For travelers wanting to explore beyond the resort areas and connect with Aruba's creative and cultural roots, San Nicolas is a must-visit destination — a colorful treasure at the island's southern edge.

Bohemian: A secret-garden evening in the heart of Palm Beach

THE ADVISOR AI PARTNER NETWORK

By ArubaTouristChannel.com

French flair, world cuisine, live entertainment and a distinctive garden atmosphere make Bohemian a strong recommendation when the traveler is looking for more than dinner alone.

In the middle of Palm Beach's high-rise energy, Bohemian Bar & Restaurant creates a completely different mood. The concept is built around a relaxed secret-garden setting, French flair and a world-cuisine menu, giving guests the feeling of stepping away from the main strip without actually leaving it.

That atmosphere is one of the reasons Bohemian works so well inside The Advisor network. Visitors rarely ask only for "food." They ask for a romantic evening, somewhere stylish before going out, a place for cocktails, a restaurant with entertainment, or a setting that feels special enough for a birthday or anniversary. Bohemian answers several of those intentions at once.

The restaurant's Palm Beach location makes it particularly practical for travelers staying in the high-rise hotel area. Guests can combine dinner with an evening walk, nightlife or drinks without turning the night into a transportation project. Bohemian also programs live entertainment throughout the week, including flamenco, violin, lounge performances and late-night house music on selected evenings. A daily happy hour on selected drinks adds another reason to arrive before dinner and let the evening unfold gradually.

For special occasions, Bohemian also accommodates private events, including birthdays, corporate gatherings, rehearsal dinners and anniversaries. This allows The Advisor AI to recommend the venue not only for a normal dinner but for visitors who are actually trying to organize a moment.

Aruba Tourist Channel sees Bohemian as a model for the new partner relationship: editorial storytelling, social amplification, video, magazine presence and AI discovery can work together. Instead of relying on a single advertisement, the restaurant can appear when the traveler's question makes it relevant.

Our recommendation: choose Bohemian when the atmosphere matters as much as the menu. It is especially well suited to couples, groups of friends and visitors who want dinner to become the start of the night rather than the end of the day.

THE ADVISOR RECOMMENDS THIS FOR

- Romantic dinners and anniversary evenings
- Stylish group dinners in Palm Beach
- Visitors who want live music or late-night atmosphere
- Private events and celebrations
- A dinner-plus-nightlife itinerary without long transfers

JOIA Aruba by Iberostar: Luxury on Eagle Beach, understood through experience

THE ADVISOR AI PARTNER NETWORK

By ArubaTouristChannel.com

A five-star beachfront resort with ocean-facing suites, pools, spa, golf access and a strong culinary program, JOIA gives The Advisor AI a premium accommodation profile that can be matched to the purpose of the trip.

JOIA Aruba by Iberostar brings a contemporary luxury resort experience to Eagle Beach. The property combines a beachfront setting with 240 suites, three pools including an infinity pool, spa services, multiple restaurants and bars, 24-hour room service and access to golf at Tierra del Sol. Some room categories include whirlpool terraces or semi-private pools, creating meaningful differences for couples, celebrations and travelers who want more privacy.

For Aruba Tourist Channel, JOIA is important for another reason: it helps demonstrate Experience Intelligence. Hotel recommendation should be more than a rate, a star category and an amenities checklist. A traveler choosing a hotel for a honeymoon is making a different decision from a family, a group of friends or a business traveler. The details of how a room feels, how private the terrace is, how easy it is to move between beach, dining and pool, and how the property fits the rhythm of a stay all matter.

JOIA's location near Eagle Beach makes it especially compelling for visitors who want direct access to one of Aruba's signature coastlines while remaining within easy reach of Oranjestad and Palm Beach. The resort also has a notable culinary ecosystem of its own, with concepts such as GAIA House of Grill, Bucatini Market & Cucina, Marea and Zima Rooftop Bar. That gives guests the option of building several distinct dining experiences into the stay without leaving the property.

The resort also communicates sustainability measures that include eliminating single-use plastics, using renewable electricity and providing purified-water stations. For visitors who actively consider responsible tourism practices when choosing accommodation, these elements can become part of the recommendation context.

Our recommendation: JOIA fits travelers who want Aruba to feel polished, calm and high-touch, but still connected to the island. It is particularly strong for couples, special occasions, luxury leisure travelers and guests who want a resort with enough dining and wellness variety to make staying on property part of the vacation rather than simply a place to sleep.

THE ADVISOR RECOMMENDS THIS FOR

- Luxury beach vacations on Eagle Beach
- Couples, anniversaries and special occasions
- Travelers who value room design, privacy and high-end amenities
- Guests who want several restaurants, bars and wellness options on property
- Visitors looking for a premium base between Oranjestad and Palm Beach

Mandara Spa Aruba: Build recovery into the vacation

THE ADVISOR AI PARTNER NETWORK

By ArubaTouristChannel.com

A newly reimagined 6,500-square-foot sanctuary at Marriott's Aruba Ocean Club, Mandara Spa turns wellness into a complete part of the Aruba itinerary rather than an afterthought.

Aruba vacations can be wonderfully active: sun, water, tours, late dinners, long beach days and full itineraries. Mandara Spa Aruba gives travelers a reason to deliberately slow the pace.

Located at Marriott's Aruba Ocean Club in Palm Beach, Mandara Spa has been reimagined as a 6,500-square-foot wellness sanctuary with 12 treatment rooms, private couples' rooms, a relaxation lounge, full-service salon and an expanded thermal experience. The facilities include steam and sauna areas, an indoor co-ed relaxation lounge and an outdoor thermal area with an experiential shower, cold plunge, hot tub, hydrotherapy elements and loungers.

The spa's treatment philosophy combines Balinese traditions with European methods and local influences. That local connection matters in Aruba. Services such as Massage de la Aruba are designed around long, gentle strokes and deep relaxation, while the Aloe and Milk Bath Wrap speaks directly to a common vacation need: soothing and hydrating skin after sun exposure.

Inside The Advisor AI, Mandara is not simply "a spa." It can be recommended based on the structure of the trip. A couple may want a treatment before a special dinner. An active traveler may benefit from a recovery afternoon after an adventure day. A guest who has spent several days in the sun may want a body treatment. Honeymooners may prefer a couples experience. The recommendation becomes stronger because the wellness moment is connected to the itinerary.

Our recommendation is to reserve enough time to experience Mandara as more than a single massage appointment. When possible, build the treatment into a slower day and leave room before or after for the thermal areas and relaxation spaces. The value is not only the service itself; it is the change of pace.

For visitors who believe the best Aruba vacation should include both discovery and restoration, Mandara is an easy fit.

THE ADVISOR RECOMMENDS THIS FOR

- Couples and honeymooners
- Recovery after an adventure or watersports day
- Travelers seeking a full wellness afternoon
- Guests looking for locally inspired aloe or Aruba-themed treatments
- Visitors staying in or near Palm Beach

Whether you're arriving for a family vacation, romantic getaway, or business trip, this guide explains how Aruba's airport works and the best ways to move around the island.

1. Queen Beatrix International Airport (AUA)
Aruba's main airport, Queen Beatrix International Airport, is the gateway to the island, welcoming millions of visitors each year. It is located just minutes from Oranjestad and about 10–15 minutes from most major hotels.

Modern & Efficient
The airport has undergone significant upgrades, offering a clean, modern terminal, smooth check-in processes, and comfortable waiting areas.

- No additional customs lines
- This saves time and makes travel smoother for American visitors.

Airport Services
The airport offers:
- Duty-free stores
- Restaurants and cafés
- Car rental desks
- ATMs & currency exchange
- Wi-Fi
- Accessible facilities
- Taxi ranks & shuttle pick-up zones

2. Transportation From the Airport
Aruba's airport is close to all major hotel zones, so travelers have several easy options.

Taxis
Taxis in Aruba are safe, reliable, and regulated by fixed rates.
Fares depend on destination, time of day, and number of passengers.
- No meters are used — pricing is predetermined.
- Approximate travel times from AUA:
- Palm Beach: 15 minutes
- Eagle Beach: 12 minutes
- Oranjestad: 5 minutes
- Noord: 15 minutes

Ideal for travelers who want:
- Freedom to explore
- Day trips to beaches and nature parks
- Quick access to Baby Beach, Arikok, and remote areas
- Shuttle Services
- Some hotels and tour operators provide private or shared shuttle transfers.
- These must be arranged in advance.

Public Bus (Arubus)
Aruba's public bus system is reliable and budget-friendly.

The bus stop is located just outside the airport.
Routes take passengers to Oranjestad, Eagle Beach, and Palm Beach.
Great for travelers without much luggage and wanting to save money.

3. Getting Around Aruba
Aruba is compact and easy to navigate — most attractions are only minutes apart.

Car Rental
A car provides the most flexibility, especially if you plan to explore:
- Arikok National Park
- Northern cliffs
- Surfside Beach
- Baby Beach
- Natural Pool areas
- Vehicles are available in all sizes, from compact cars to jeeps for off-road adventures.

Taxis

4. Transportation Tips for Visitors
Buy SIM Cards at the Airport
Local SIM cards or eSIMs offer affordable data for maps and navigation.

Drive Carefully in Roundabouts
Aruba uses European-style roundabouts, yield to traffic inside the circle.

Parking
Hotels often include free parking.
Paid parking zones exist in Oranjestad.
Street parking near beaches is generally free.
Plan Airport Timing Carefully
For U.S.-bound flights, arrive 3 hours early due to pre-clearance.
For non-U.S. flights, 2 hours is typically sufficient.

Taxis Don't Use Meters
Always check the official rate card (posted at the airport and inside taxis).

Consider a Weekly Bus Pass
Budget travelers can save by purchasing multi-day Arubus passes.

GAIA House of Grill: Where fire, sea and Eagle Beach meet

THE ADVISOR AI PARTNER NETWORK

By ArubaTouristChannel.com

Premium cuts, seafood and a nature-inspired culinary identity make GAIA a strong recommendation for visitors looking for a refined dinner with a sense of place.

GAIA House of Grill at JOIA Aruba by Iberostar is designed around the idea of the earth as the starting point of the meal. The concept takes its name and inspiration from Gaia, the Greek personification of Mother Earth, and translates that theme into a menu centered on premium grilled cuts, seafood, seasonal produce and carefully selected local elements.

Located at JOIA overlooking the Eagle Beach area, GAIA is especially well positioned for travelers who want dinner to feel like a destination rather than a convenient stop. The restaurant's identity is contemporary but grounded in fire, ingredients and technique. That makes it relevant to several types of visitor intent: a steak-focused dinner, a polished date night, a special celebration, or simply an evening when the traveler wants something more refined than casual beach dining.

The menu combines land and sea rather than limiting the experience to one category. That flexibility is useful for couples and groups where not everyone wants the same thing. One guest may be drawn to grilled meat while another prefers seafood or seasonal preparations. The setting and service are intended to carry the evening beyond the plate.

For The Advisor AI, GAIA demonstrates why dining recommendations should be contextual. "Where should we eat?" is too broad. A better question is: what kind of evening are you trying to create? If the traveler wants a relaxed beach bar, the answer should be different. If the traveler wants a polished grill experience near Eagle Beach, GAIA becomes highly relevant.

Our recommendation: use GAIA for one of the more intentional dinners of the trip. It fits beautifully after a slower beach or spa day, and it is particularly appropriate for couples, celebrations and food-focused travelers who want a contemporary grill experience in an upscale resort environment.

THE ADVISOR RECOMMENDS THIS FOR

- Steak and grill enthusiasts
- Couples and special-occasion dinners
- Mixed groups that want both premium meats and seafood
- Guests staying around Eagle Beach
- A refined dinner after a beach or wellness day

Bucatini Market & Cucina: Italy, served with Aruba's coastal ease

THE ADVISOR AI PARTNER NETWORK

By ArubaTouristChannel.com

From the tableside Aperitivo ritual to an antipasto station and signature pasta dishes, Bucatini gives Italian dining a distinctive place inside the JOIA Aruba experience.

Bucatini Market & Cucina brings a polished but approachable Italian experience to JOIA Aruba by Iberostar. The concept is built around classic Italian flavors, contemporary presentation and small details that turn dinner into a ritual rather than a simple meal.

The experience can begin with Bucatini's Aperitivo cart, where a personalized cocktail can be prepared tableside. The restaurant also highlights what it describes as Aruba's only dedicated antipasto station, prepared with Italian cheeses, artisanal cold cuts, rustic breads and seasonal accompaniments. A signature cheese cart featuring different Parmigiano and Pecorino selections adds another layer for guests who enjoy the traditions behind the food as much as the final dish.

On the menu, Bucatini combines familiar comfort with modern touches. Signature items highlighted by the restaurant include Rigatoni alla Vodka, Kale Carbonara and a refined Caesar interpretation, followed by traditional Italian desserts. The bar program includes crafted cocktails and off-menu creations, making the restaurant suitable for both a full dinner and a more leisurely evening built around aperitivo, food and conversation.

The Advisor AI can recommend Bucatini when the visitor's intent is more specific than "Italian restaurant." It works particularly well for date night, a stylish dinner with friends, or a traveler who wants familiar flavors in a refined environment. Because it is inside JOIA near Eagle Beach, it can also be matched geographically to guests staying in the low-rise area or to an itinerary already centered around Eagle Beach.

Our recommendation is to treat Bucatini as an evening experience and not rush it. Start with the aperitivo element, explore the antipasto offering and then move into pasta or a main course. The restaurant's strongest appeal is the combination of recognizable Italian comfort and the sense of occasion created by its service rituals.

For travelers who want one elegant Italian night during an Aruba vacation, Bucatini is an easy recommendation.

THE ADVISOR RECOMMENDS THIS FOR

- Italian-food lovers
- Romantic date nights
- Stylish dinners with friends
- Guests staying around Eagle Beach or JOIA
- Travelers who enjoy aperitivo, antipasto and crafted cocktails

The Birdie: Dine where Aruba's north coast meets the green

THE ADVISOR AI PARTNER NETWORK

By ArubaTouristChannel.com

Panoramic views, an outdoor terrace and the Tierra del Sol setting make The Birdie a lifestyle dining recommendation as much as a restaurant recommendation.

The Birdie Restaurant at Tierra del Sol offers something that immediately changes the dining experience: space and perspective. Set along Aruba's north coast within Tierra del Sol, the restaurant looks across landscaped grounds toward the island's rugged coastal scenery, creating a visual identity that is very different from dining in the hotel district.

The menu combines classic international cuisine with contemporary touches and is designed to work across different occasions, from lunch and brunch to dinner, celebrations and business meals. The outdoor terrace is central to the experience, making The Birdie particularly attractive to visitors who want a meal that feels connected to Aruba's landscape.

Its position inside Tierra del Sol also gives the restaurant a lifestyle dimension. Golf, villas, spa and north-coast scenery all sit around the same environment. For The Advisor AI, that opens the door to more intelligent combinations. A golfer can finish a round with lunch or drinks. A couple exploring Arashi, Malmok or the California Lighthouse area can continue the day with a scenic meal nearby. A family or group staying in the northern residential areas can enjoy a quality restaurant without returning to Palm Beach or Oranjestad.

The Birdie also works well for travelers who are more interested in atmosphere than nightlife. The setting encourages a slower meal: views, conversation, cocktails and food without the intensity of a busy entertainment strip.

Our recommendation is to use The Birdie when the itinerary already brings you toward Noord, Malmok, Arashi or Tierra del Sol. It is a natural way to connect a north-coast day with a dining experience that remains visually tied to that part of the island.

For travelers who want Aruba dining with a sense of place—and especially for those who appreciate golf, open-air settings and scenic surroundings—The Birdie deserves a place in the plan.

THE ADVISOR RECOMMENDS THIS FOR

- Scenic lunches and dinners
- Golfers and Tierra del Sol visitors
- Couples who prefer atmosphere over nightlife
- Guests staying in Noord, Malmok or the northern villa areas
- Brunch and relaxed special occasions

ABC Tours Aruba: Adventure with responsibility built into every route

THE ADVISOR AI PARTNER NETWORK

By ArubaTouristChannel.com

ABC Tours Aruba has been part of Aruba's adventure landscape since 1996, offering Jeep safaris, UTV experiences, private tours and rental options for visitors who want to explore beyond the beaches.

Inside The Advisor AI, ABC Tours can be recommended based on the type of traveler and the experience they are looking for. Families and first-time visitors may prefer a guided Jeep Safari, while couples, friends and more adventurous travelers can choose a guided UTV experience or a private tour.

What stands out is the company's emphasis on responsible use of Aruba's terrain.

In information provided directly to Aruba Tourist Channel, ABC Tours explained that its routes are supported by GPS guidance and include protected "no-go zones" that vehicles are not allowed to enter. The company also says it monitors speed and driving behavior through GPS and can intervene when rental rules are seriously violated.

That means the adventure is not only about where you go, but also about how you get there.

Our recommendation is to choose ABC Tours if you want to experience Aruba's rugged side with structured routes, local guidance and clear rules designed to support safety and respect for the island's natural environment.

THE ADVISOR RECOMMENDS THIS FOR

Families and first-time visitors
Jeep Safari experiences
Guided UTV adventures
Private tours
Travelers who value structured routes and safety
Visitors who support responsible access to Aruba's natural areas

Aruba Taxi Network: Make transportation part of the plan, not a last-minute problem

THE ADVISOR AI PARTNER NETWORK

By ArubaTouristChannel.com

Taxi Service Aruba, Aruba Taxi Centrale and Aruba Airport Taxi Service add a practical mobility layer to The Advisor AI, helping visitors connect airport, hotel, restaurants and experiences more intelligently.

Transportation is one of the least glamorous parts of vacation planning—and one of the most important. A perfect dinner reservation or carefully planned activity is not useful if the traveler is unsure how to get there, what the ride should cost or whether transportation will be available afterward.

That is why Aruba Tourist Channel treats taxi information as part of destination intelligence rather than a separate utility. Through The Advisor AI, visitors can connect practical transportation questions to the rest of the itinerary and, where relevant, be directed toward participating services including Taxi Service Aruba, Aruba Taxi Centrale and Aruba Airport Taxi Service.

Aruba's taxi fares are regulated by the Government of Aruba and are not meter-based. In 2026 the government launched Taxi.aw as the official platform for current fares, conditions and a fare calculator. That gives visitors an important reference point before the ride. The platform can account for factors such as route, passenger count, luggage, time and applicable surcharges, and only vehicles carrying an authorized TX license plate may legally provide taxi service.

For The Advisor, the value comes from connecting that official fare information with the traveler's actual day. If a visitor is staying in Palm Beach and planning dinner in Oranjestad, transportation can be considered when the restaurant is recommended. If a couple has an early flight, the airport ride should be part of the departure plan. If a guest does not rent a car, the itinerary should avoid sending that person across the island repeatedly without considering taxi costs and travel time.

Our recommendation is simple: plan important rides before they become urgent. Use the official fare calculator for current rates, confirm pickup details, and allow extra time for airport departures and busy evening periods.

For visitors who prefer not to drive in Aruba, a taxi-based itinerary can work very well—as long as mobility is considered from the beginning.

THE ADVISOR RECOMMENDS THIS FOR

- Airport arrivals and departures
- Visitors who do not want to rent a car
- Evening dining and nightlife transportation
- Point-to-point travel between hotels, beaches and activities
- Travelers who want official fare guidance before riding

Personalized massage, bodywork and facial rituals create a quieter kind of Aruba experience—one designed around how the guest wants to feel, not around a generic treatment menu.

Zia's Healing Touch is built around a simple but powerful idea: wellness should begin with the person, not the procedure. Founder and massage therapist Krizia Patricia López describes her approach as listening first and shaping the treatment around what the body is actually feeling.

That philosophy makes Zia especially well suited to personalized travel recommendations. Some visitors arrive carrying tension from work and travel. Others spend several days in the sun and need skin recovery. Some want deeper therapeutic bodywork, while couples want to share a quiet experience together. Zia's current menu includes massage and body treatments, reflexology, hot-stone work, deep-tissue options, body wraps and scrubs, as well as facial treatments designed around hydration, sun recovery, balance and renewal.

The website organizes the experience by intention—relax, release tension, feel renewed, reconnect, care for the skin or share the experience. That language fits naturally with The Advisor AI because it allows the recommendation to begin with the traveler's need rather than with a technical service name.

Among the available experiences are Tranquility Touch, Healing Stone Touch, Healing Touch Therapy, Deep Healing, Zia's Reflexology and Zia Luxury Renewal. Facial options include Sun Recovery, Hydra Glow, Clear Balance, Deep Purity and Age Defy. Special experiences by request include Full Body Therapy and Harmony For Two.

Zia is also designed for appointment-based privacy. The booking flow lets guests choose an experience and preferred time, after which the team confirms the request directly. This works well for visitors who want a more personal wellness setting rather than a large resort-spa environment.

Our recommendation: use Zia on a day when the itinerary needs less movement and more recovery. It is particularly strong after several beach days, after travel, or before an important dinner or celebration when the guest wants to feel restored rather than rushed.

THE ADVISOR RECOMMENDS THIS FOR

- Personalized massage and therapeutic bodywork
- Travelers needing tension release or recovery
- Sun-care and facial treatments
- Couples looking for a private shared wellness experience
- Visitors who prefer appointment-based, personal care

Ling & Sons Food Market: The stop that makes a villa or condo vacation easier

THE ADVISOR AI PARTNER NETWORK

By ArubaTouristChannel.com

For self-catering travelers, families, beach days and longer stays, a well-stocked supermarket can be one of the most useful recommendations in the entire itinerary.

Not every useful tourism recommendation is a tour, restaurant or attraction. Sometimes the most valuable advice is where to buy breakfast for tomorrow morning, drinks for the room, snacks for the children or everything needed for a beach picnic. That is where Ling & Sons Food Market fits into The Advisor AI.

Located on Schotlandstraat in Oranjestad, Ling & Sons is a full-service food market with fresh meats, deli products, beverages, juices, wine and a broad range of everyday groceries. The store accepts major credit cards and serves both residents and visitors, making it particularly practical for travelers who are staying in apartments, condos, villas or hotel rooms with kitchen facilities.

The recommendation becomes even more useful when it is placed at the right moment. A family arriving for a week may benefit from stopping at the supermarket early in the trip rather than buying every snack and drink individually. A villa group planning a private-chef evening may still need breakfast items, fruit, water and beverages. Visitors heading out for a long beach day can prepare ahead instead of relying on whatever is available near the beach.

For travelers with children, dietary preferences or a longer stay, having a supermarket option also creates independence. The vacation does not need to revolve around restaurant opening hours for every meal.

This is why Ling & Sons is a strong example of practical destination intelligence. The Advisor can recommend the market when the visitor's accommodation type, family profile or itinerary makes it relevant rather than showing the same suggestion to everybody.

Our recommendation: if you are staying in a villa, condo or apartment for more than a few days, make Ling & Sons one of the first practical stops after arrival. Stock the essentials once, then spend the rest of the trip thinking about Aruba instead of small daily errands.

THE ADVISOR RECOMMENDS THIS FOR

- Villa, condo and apartment guests
- Families and longer-stay visitors
- Breakfast, snacks, drinks and beach-day supplies
- Travelers planning self-catering or private-chef evenings
- Visitors who want one practical grocery stop early in the trip

Rexa Bizou: Take home a piece of Aruba you can actually wear

THE ADVISOR AI PARTNER NETWORK

By ArubaTouristChannel.com

Handmade and personalized jewelry gives travelers an alternative to the generic souvenir—something personal, giftable and connected to Aruba.

The best travel souvenirs are often the ones that continue to have meaning after the suitcase is unpacked. Rexa Bizou creates handmade accessories and personalized jewelry in Aruba, giving visitors the opportunity to take home something more personal than a standard souvenir-shop item.

The brand's collections include earrings, necklaces, bracelets, rings, men's pieces, couples pieces and customized designs. Aruba-focused lines such as the Aruba Mi Isla and Arubiano Mi Ta collections use island identity and flag-inspired elements, while personalized options allow names, messages, birthstones and other details to become part of the piece.

That makes Rexa Bizou especially useful as a recommendation for several different traveler needs. A visitor may be looking for a gift for someone at home. A couple may want a small keepsake from a honeymoon or anniversary trip. A family may want something with an Aruba connection that feels more lasting than a T-shirt. A repeat visitor may be looking for a new island-inspired piece rather than another conventional souvenir.

Personalization also gives the experience a stronger emotional value. A name necklace, engraved bracelet or custom message can connect the object to the reason for the trip. The piece becomes a reminder of the people and moment associated with Aruba rather than simply a product purchased on vacation.

For The Advisor AI, Rexa Bizou expands the visitor journey into local retail and gifting. Intelligent tourism should not stop at hotels, tours and restaurants. Shopping, locally made products and personal mementos are also part of how travelers experience and remember a destination.

Our recommendation: consider Rexa Bizou when you want an Aruba gift with personality—especially for a birthday, anniversary, couple's trip or a traveler who values handmade and customizable items.

THE ADVISOR RECOMMENDS THIS FOR

- Locally made Aruba souvenirs with more personality
- Personalized gifts and keepsakes
- Couples, anniversaries and milestone trips
- Jewelry and accessories inspired by Aruba identity
- Travelers who prefer handmade products over generic souvenirs

The Advisor AI Partner Network: Be discovered. Be recommended. Be chosen.

THE ADVISOR AI PARTNER NETWORK

By ArubaTouristChannel.com

Thirteen Aruba partners, one connected visitor journey — from adventure, hotels and dining to wellness, transportation, shopping and diving.

World Tourism Day 2026 is about using the digital agenda and artificial intelligence to redesign tourism. Aruba Tourist Channel is applying that idea locally by connecting trusted tourism businesses to the moments when visitors are actually deciding what to do next.

The Advisor AI Partner Network is designed around relevance. A restaurant should appear when the dining request fits. A hotel should be introduced when the stay matches the traveler's purpose. A wellness provider should surface when the itinerary needs recovery. A taxi recommendation becomes useful when the traveler needs to move. A local retailer can appear when the visitor is looking for a meaningful Aruba gift.

This edition brings together thirteen businesses and service categories that demonstrate how broad that network can become. They are not presented as a universal ranking. Each partner solves a different visitor need, and The Advisor is designed to understand that context before recommending an option.

For Aruba's tourism economy, this creates a different kind of visibility: not only being seen, but being discoverable at the moment of intent. For the visitor, it creates a simpler journey with fewer disconnected searches and more Aruba-focused guidance.

The digital gateway to Aruba begins before the plane lands

World Tourism Day 2026 • 8th Anniversary Edition

By ArubaTouristChannel.com

For most travelers, Aruba begins on a screen. The first interaction may be a video, article, hotel page, social post or a question asked to an AI assistant.

Before arrival matters

By the time the visitor reaches Queen Beatrix International Airport, dozens of decisions may already have been made. A useful digital tourism system should help the traveler arrive prepared rather than overwhelmed.

Connect the decisions

Accommodation should connect naturally to transportation. Transportation should connect to the first day. The first day should recognize arrival time, luggage, fatigue and check-in. The departure day should account for airport timing rather than behaving like a normal vacation day.

One connected pre-arrival journey

The Advisor AI can answer questions. The itinerary maker creates structure. Hotel discovery helps match the stay to the traveler. Transfer recommendations solve arrival logistics. Editorial and video add context. Partner recommendations create actionable next steps.

Digital and physical gateways

Technology does not replace the airport, hotel concierge, tour guide or taxi professional. It prepares visitors to use those services more confidently. The digital gateway and the physical gateway should work toward the same result: a smoother Aruba experience.

During the stay: AI becomes a travel companion

World Tourism Day 2026 • 8th Anniversary Edition

By ArubaTouristChannel.com

The most useful tourism AI does not stop working once the itinerary is created. During the stay, plans change, weather changes, energy levels change and new questions appear.

What should we do next?

A visitor may suddenly have three free hours, need an activity near the hotel, want dinner after a tour, look for a quiet beach or need transportation to another part of the island.

Context can reduce friction

When The Advisor understands where the traveler is staying, the type of trip and what has already been planned, the next suggestion can be more practical than starting another generic search.

Keep the traveler in control

In-destination assistance should provide options and context, not force one answer. The visitor still decides what fits.

A living itinerary

The long-term direction is an itinerary that behaves less like a printed schedule and more like a travel companion: structured enough to be useful, flexible enough for a real vacation.

Why this matters

The better the system understands the actual trip, the less time the visitor spends assembling information and the more time remains for Aruba itself.

Midnight Sun Yacht

By ArubaTouristChannel.com

A private luxury yacht experience designed around the traveler, Midnight Sun gives visitors the freedom to experience Aruba's coastline through sunset cruises, snorkeling, celebrations and personalized days at sea.

Some of Aruba's most memorable views are not from the beach, but from the water.

Midnight Sun Yacht gives visitors the opportunity to experience that perspective privately, with charters designed for couples, families, groups of friends and special occasions. Rather than joining a large group excursion, the experience can be shaped around the people on board and the type of Aruba memory they want to create.

Midnight Sun offers private charter experiences including sunset cruises, party yacht experiences, family snorkeling trips and private outings for groups. This makes it a strong option for travelers looking for more privacy, flexibility and a more personal way to enjoy Aruba from the sea.

Inside The Advisor AI, Midnight Sun can be recommended based on the type of traveler and the occasion. A couple may want a romantic sunset experience. A family may prefer a private snorkeling day. A group of friends may want to celebrate a birthday, bachelor or bachelorette event, or simply enjoy a private day on the water.

Depending on the selected charter and weather conditions, the experience can include cruising along Aruba's coastline, swimming, snorkeling, sightseeing and relaxing on board. Special occasions can also be personalized when arranged in advance.

Our recommendation is to decide what role the yacht should play in your vacation. For couples, sunset is an ideal moment. Families should allow enough time for swimming and snorkeling. Groups celebrating something special should communicate the occasion before the charter so the experience can be planned around it.

For visitors looking for privacy, flexibility and a different perspective of Aruba, Midnight Sun turns the Caribbean Sea into part of the vacation itself.

THE ADVISOR RECOMMENDS THIS FOR

Couples, anniversaries and romantic proposals
Families looking for a private snorkeling experience
Birthdays and special celebrations
Bachelor and bachelorette groups
Friends looking for a private day on the water
Travelers who prefer privacy over large group excursions

Aruba's tourism frontline must remain inside the digital future

World Tourism Day 2026 • 8th Anniversary Edition

By ArubaTouristChannel.com

Tourism technology may be developed in offices and on screens, but the visitor experiences Aruba through people. Tour guides, taxi drivers, hotel employees, restaurant teams, watersports crews, chefs, spa professionals and local business owners are the destination's frontline.

Technology should strengthen the frontline
AI can help visitors find the right service, understand the next step and arrive better informed. It should not erase the people who create the actual experience.

Local knowledge has operational value
A guide knows what a route feels like. A taxi professional understands real movement through the island. A hotel employee knows the rhythm of arrivals and departures. A chef understands how an experience works for a real group. Those details are difficult to capture through generic data alone.

A better feedback loop
The strongest destination intelligence will combine structured digital information with what tourism professionals learn every day from visitors.

Why this matters for Aruba
When the frontline is included, AI can become more accurate, practical and culturally grounded. When the frontline is ignored, technology risks becoming disconnected from the destination it is supposed to represent.

The principle
The future of Aruba tourism should be digitally intelligent and deeply human at the same time.

AI with a human purpose

World Tourism Day 2026 • 8th Anniversary Edition

By ArubaTouristChannel.com

Artificial intelligence can make travel faster, easier and more personalized. It can also make tourism more repetitive if every platform recommends the same places for the same reasons.

Local knowledge first

For Aruba Tourist Channel, local knowledge is not an optional layer added after the technology. It is the foundation. Aruba is a living community before it is a tourism product.

Relevance beyond popularity

Recommendations should consider more than what is globally visible. They should help visitors understand where they are going, what different parts of the island offer and how local businesses contribute to the experience.

People still deliver hospitality

A tour guide, chef, hotel employee, taxi driver, wellness professional or restaurant team creates the actual human experience. Technology can help the traveler reach the right person, but hospitality still happens between people.

Trust requires maintenance

Travel information changes. Roads close, operating hours change, transportation rules evolve and businesses update their services. Responsible AI requires continuous local verification.

The goal

Not an automated Aruba. An Aruba where digital tools make the human destination easier to discover and understand.

ARUBA QUEST

What comes next

World Tourism Day 2026 • 8th Anniversary Edition

By ArubaTouristChannel.com

The tools launched during 2026 are a foundation, not a finish line. The next phase is focused on making Aruba more interactive, personal and easier to explore without losing the island's identity.

Location-aware discovery

Future travel guidance can become more useful when suggestions respond to where a visitor actually is on the island and how much time is available.
Aruba Quest

Gamified concepts such as Aruba Quest can turn exploration into challenges, discoveries and achievements, giving travelers reasons to learn about places rather than simply pass through them.
AI-generated visitor memories

Personalized digital souvenirs can connect a visitor's own travel moments with the Aruba locations they experienced.
Expanded Experience Intelligence

First-hand observation can grow beyond hotels into tours, dining, wellness and other services so The Advisor understands more than standard inventory data.
A larger partner network

More tourism categories can join the recommendation ecosystem, widening the range of Aruba businesses that can become discoverable at relevant moments.
Keep technology almost invisible

Not every innovation needs another app. The best technology can remain in the background. The visitor should simply feel that Aruba became easier to plan, easier to understand and richer to explore.

Eight years of showing Aruba. The next journey has already begun.

WORLD TOURISM DAY 2026 • 8TH ANNIVERSARY

Aruba Tourist Channel began by showing visitors Aruba. Today we are building a tourism network where local knowledge becomes intelligent guidance, where a question can become an itinerary and where relevant Aruba businesses can become part of the visitor journey.

Built in Aruba. Powered by local knowledge. Guided by AI.
